Edgar Stewart Case Study

Introduction

Edgar Stewart is a dynamic talent management and recruitment business formed specifically to meet the needs of tech companies by leveraging technology to access a global marketplace of candidates across 270 social networks and platforms.

Director Craig Jackson tells us how My1Login's Single Sign-On helped Edgar Stewart put client security at its core, helping them differentiate from competitors and win more business.

Edgar Stewart*

The Challenge

In a sector that is renowned for ex-employees raiding their previous agency's databases for client and candidate data, Edgar Stewart wanted to build data security into it's DNA. Craig explains **"As a data driven business, Edgar Stewart take online security very seriously and as a rapidly growing company our time is extremely precious. We needed a time-saving Single Sign-On solution that put us head and shoulders above our competitors in terms of security whilst making us fully compliant with data protection legislation."**

The Solution

"My1Login's Single Sign-On has given us a simple and quick solution to our having strong, unique passwords without the hassle of trying to remember them all!

The ability to review similar passwords or logins with the same password really highlighted the potential risk we had online. Having now conducted an audit and subsequently updated all of our passwords we are now much more confident in our security both internally and externally.

The one-click login feature that enables our users to by automatically signed into applications has been a revelation as we no longer have to remember multiple logins and passwords, or constantly reset them". My1Login's SSO service also enables Edgar Stewart to quickly cease user access to confidential systems when they leave the business, protecting client and candidate data from being "raided" by ex-employees.

> "Edgar Stewart win more business thanks to My1Login"

The Benefits

Craig continues, **"My1Login has saved us a significant amount of time in not having to constantly reset passwords when they have been forgotten. We have gone from the typical, one password for multiple login's to unique 15 character sets meaning we are much more secure online."**

When it comes to winning tenders, **"My1Login has also been a massive help in proving Edgar Stewart have robust password management and audit systems that are complaint with data protection and security legislation. This provides a strong differentiator and differentiators help win more business"**
